Executive Summary

This document constitutes the first version of the COLOSSUS project's Dissemination and Communication Plan (DCP).

COLOSSUS presents an integrated solution for digital security, resilience, and maintenance of port infrastructures, providing real-time data access from autonomous vehicles and sensors. Developed in response to the increasing demand for maritime security, COLOSSUS aims to revolutionize the protection of EU maritime infrastructures, aligning with the updated EU Maritime Security Strategy (EUMSS 2023). By bringing together Small and Medium-sized Enterprises (SMEs) from various Member States, the project leverages their innovation potential to tackle key challenges outlined in the EU's Blue Growth strategy and the European Green Deal.

The advanced COLOSSUS solutions will be demonstrated in an operational environment (integrated pilot system level) for iterative performance evaluation and validation. Starting with stress testing in a laboratory setting, the project will move towards real-world operational conditions in ports. Defined use cases will enable operational evaluation and validation across diverse scenarios at the ARSENAL DO ALFEITE SA (AASA) naval base in Portugal.

The document describes the overall communication activities and awareness-raising, dissemination of project results, management of all relevant activities, and partners' responsibilities in this respect. It includes specific actions and activities that will be carried out by the COLOSSUS consortium members in order to ensure success and maximum publicity for the project and its results. With that said, this deliverable outlines:

1. **What to disseminate** – Basic project-related information that will be conveyed throughout the project.
2. **To whom** – Key stakeholder groups that will serve as the main audiences for the project's dissemination and communication activities.
3. **How** – Channels and tools that will be utilised by project partners in order to successfully implement the dissemination and communication activities.
4. **When** – A time frame to ensure that the timing of the dissemination and communication activities is appropriate, during the lifespan of the project and beyond.
5. **Monitoring of the process** – Indicators to measure success in the dissemination and communication actions, enabling partners to refine efforts and actions over the course of the project.

As an integral component of its dissemination and communication strategies, COLOSSUS actively seeks to establish synergies with relevant projects and initiatives. This strategic approach is designed to cultivate collaboration, facilitate knowledge exchange, promote the development and adoption of best practices, and engage in joint communication activities.

The DCP will be updated in October 2026 (M12) and its final version will be available at the end of the project in October 2027 (M24). The updates will include results and metrics of the dissemination and communication activities by the time of reporting.

1. Introduction

1.1. Scope of the deliverable

This report, titled "D6.1 Dissemination & Communication Plan – 1st Version", aims to design the strategy, plan and activities to be implemented under the COLOSSUS, with a view to maximising the project's visibility and successfully convey its key messages and content to target audiences, identifying and employing the most suitable channels to spread them. Keeping that in mind, this deliverable outlines the approach to (i) effectively communicate the project and disseminate its results, (ii) guide the partners in designing, planning and implementing their individual dissemination activities and (iii) continuously monitor the efficiency and the timely planning of the actions. In this respect, the deliverable aims to:

- Describe the types of dissemination channels and tools to be utilised and the required actions and resources.
- Define responsibilities among partners.
- Summarise the internal monitoring, evaluating, and reporting of dissemination activities.
- Provide an indicative timetable/work planning of promotion activities during the project.

1.2. Structure of the deliverable

Taking the above into consideration, the report is structured as follows:

- **Chapter 1 – Introduction:** Provides introductory information with respect to the DCP
- **Chapter 2 – Dissemination assets:** Presents the main assets and information of the project during and beyond its span.
- **Chapter 3 – Targeted stakeholder groups:** Presents the key stakeholder groups that will serve as the main audiences for the project's dissemination and communication activities.
- **Chapter 4 – Channels and tools:** Encompasses all the channels and tools that will be utilised for the dissemination and communication activities of the project, such as the project's website, social media accounts (SMAs) etc.
- **Chapter 5 – Time plan:** Provides the timeframe for the communication and dissemination activities of the project partners.
- **Chapter 6 – Key Performance Indicators (KPIs) and monitoring:** Identifies the indicators to measure success in the dissemination and communication actions, enabling partners to refine efforts over the course of the project.
- **Chapter 7 – Conclusions:** Pertains to the main decisions and aspects of the Dissemination and Communication Plan as well as the way forward.

The Annexes include the dedicated forms for the dissemination and communication activities lists (guidelines, news reporting form, and "Dissemination and Communication reporting template") to facilitate collaboration within T6.1 and ensure useful resources for the project channels.

2. Dissemination assets

The assets that follow will be disseminated by all partners with a view to maximising the project's impact and visibility. This information will be conveyed in a meaningful way and well-tailored to each stakeholder group (these groups will be further described in Chapter 3).

- **Vision, objectives, strategic relevance, and key facts:** The vision, aim and strategic objectives of the project will be widely disseminated along with all the conceptual aspects of the project, namely the whole project concept and its innovative characteristics.
- **News, achievements, and results:** During the project, news, achievements, and results will be published through press releases, on the project's website or partners' websites to inform stakeholders about the project and its contribution to circular bioeconomy.
- **Events held by the project or in which partners will participate to present their results**: The events organised by the project and their results, will be widely disseminated to attract targeted stakeholder groups along with events in which partners are participating.

Key project results and assets: Key project assets, as depicted in the following Table 2, will be disseminated as widely as possible in order to stimulate the interest of prospective end-customers and nurture the ground for their post-project rollout.

Table 2. COLOSSUS main assets/results [1]

Asset / Result
Unmanned Surface and Aerial Vessels/Vehicles (including h/w modifications)
Multi-modal Data Efficient harmonisation and analysis
Intelligent Swarm navigation for diverse UV types
3D reconstruction and modelling
Secure interfaces for port security information exchange
Research data and scientific publications
Replication Guidelines
Policy and Regulatory Recommendations

[1] *These are the COLOSSUS' main assets/results as introduced in the DoA. They will be updated via activities foreseen in T6.2 Innovation management, exploitation, and sustainability.*

3. Targeted stakeholder groups

The key stakeholder groups targeted via dissemination and communication activities of COLOSSUS are outlined in the following table:

Table 3. COLOSSUS' main target stakeholder groups

Target Stakeholder Groups	
1. Technology providers & Commercial / Industry stakeholders	- **Commercial and Industrial entities** such as port authorities, shipyards, maritime security firms, offshore energy asset companies, underwater infrastructure operators, environmental monitoring companies. These may serve as early adopters or buyers of COLOSSUS' solutions. -**Technology Providers/Businesses** (e.g., sensor suppliers, AI software developers, and UV equipment suppliers) who may develop their own applications based on COLOSSUS' solutions that may serve as partners/collaborators. - **Decision-makers and technology leaders** (e.g., CEOs, CTOs, CIOs) in companies involved in maritime critical infrastructure. - **Networks and associations around ADRA** (e.g., CAIRNE, EurAI, euRobotics, EDIHs, TEFs), particularly those involved in AI, robotics, and surveillance technologies.
2. Investors & Funding Organizations	- **Venture Capital firms and Private Investors** seeking investment opportunities in cutting-edge technology projects related to UAVs, border security, and maritime surveillance. - **Public and private funding bodies** (e.g., Horizon Europe, European Defence Fund, and EU security-focused programs) as well as national and regional funding agencies.
3. Academia & Research Institutions	- **Universities, research centres, and experts** engaged in fields such as UVs, AI, Earth Observation, Resilient and Secure infrastructures. - **Related EU-funded projects/initiatives** (e.g., AI-on-Demand platform, Digital Industrial Platform for Robotics, BlueInvest) to promote collaboration, knowledge exchange, and co-development of new capabilities.
4. Governmental & Policy Stakeholders	**- Governmental bodies** (e.g. coast guard, port authorities, ministries of defence) interested in enhancing port security through advanced technologies, acting as public buyers of COLOSSUS' solutions. - **National and EU regulatory bodies** (e.g., the EC, Frontex, European Maritime Safety Agency, MEPs), policy-making institutions (e.g., industry committees), and industry-focused agencies that influence technology adoption, regulatory standards, and funding allocations for port security and resilience.
5. General public and local communities	Emphasis on raising awareness about the benefits of improved port security and resiliency, fostering public acceptance of COLOSSUS mature solutions.

4. Channels and Tools

COLOSSUS uses a blend of online and offline communication channels and activities with a view to maximising the project's visibility to its stakeholders. These channels and activities are presented in the list as follows:

- **Graphical identity** (logo, branded templates for reports and presentations)
- **Promotional material** (leaflet, poster, roll-up banner), videos, and newsletters
- Project **website**
- Project **social media** accounts on LinkedIn, X and YouTube and partner's social media accounts
- Participation in **external events** and conferences
- **COLOSSUS events** (e.g., workshops and demo days)
- **Synergies** with relevant initiatives.

The dissemination and communication assets of the project will be distributed through the above-mentioned channels and tools to all targeted groups. Q-PLAN has provided dedicated guidelines for the expected use of communication and dissemination channels to the consortium. These are listed in Annex I.

The following table lists key channels for dissemination to be used throughout the course of the project.

Table 4: COLOSSUS' dissemination channels

Channel	Description	Groups
Publications in scientific journals & media outlets	COLOSSUS' outputs, having high research, market and social interest, as well as impact, will lead to high-quality publications disseminated to top relevant high ranked journals and conferences as well as well-known media outlets.	3
Third party events	COLOSSUS partners retain access and will attend major industry events, trade fairs, and exhibitions to disseminate COLOSSUS' outcomes.	ALL
Project workshops & events	Validation workshops, webinars, innovation challenges, and the final conference will promote the exploitation of COLOSSUS' outcomes	ALL
Consortium networks	Consortium networks	ALL
Communication activities	COLOSSUS' communication activities (e.g., video, newsletter, web portal, social media, video, newsletter, policy briefs, and white papers) will communicate and disseminate key project results, as well as policy and regulatory recommendations	ALL

In addition, the following table summarises a preliminary set of the key messages addressed towards each targeted stakeholder group of COLOSSUS as well as the set of dissemination and communication tools of the project used to convey them.

Table 5: Key messages and tools used for COLOSSUS' targeted stakeholder groups

Target group	Tools and channels	Key messages
Technology providers & Commercial / Industry stakeholders	Promotional materials, videos, newsletters; social media campaigns; trade fairs and exhibitions; COLOSSUS events; web portal; Replication Guidelines	Present opportunities for enhancing existing UV solutions and technologies through COLOSSUS results through established collaborations; highlight the availability of new AI-driven services / products for security and resilience applications, extending to both maintenance and operations. Present steps for accessing the civil security market.

Target group	Tools and channels	Key messages
Investors & Funding Organizations	Promotional materials; videos; social media campaigns; trade fairs and exhibitions; COLOSSUS events/Demo Days; web portal;	Present market-driven opportunities for investment / funding with high potential for market penetration and returns.
Academia & Research Institutions	Promotional materials, videos, social media campaigns; Publications; synergies with other projects	Promote advancements in AI and UV technologies; highlight opportunities for interdisciplinary research and collaboration to advance the state of the art in maritime security technologies.
Governmental & Policy Stakeholders	COLOSSUS events; external events; personal contacts; policy recommendations	Address the need for regulatory frameworks that support the (responsible and trustworthy) use of UVs and AI in maritime security; outline the socio-economic benefits of COLOSSUS' solutions for border security.
General public and local communities	Promotional materials, videos, newsletters; social media campaigns; web portal; trade fairs and exhibitions	Emphasise the transformative impact of AI and UV technologies on maritime security; showcase COLOSSUS' innovative solutions for efficient port security and resilience.

4.1. Graphical identity and promotional material

The design and creation of the project's graphical identity (i.e., logo, templates, etc.) aim to ensure consistency in the project communication and promotional material throughout its duration. Promotional material will be mainly used at project workshops, webinars, demo days and other external events where COLOSSUS partners participate. It will be used, also, in the everyday publicity of the project. Moreover, press releases (on ad hoc basis), newsletters (on a bi-annual basis), leaflets, posters and infographics (where needed) will stress and demonstrate with evidence the benefits of COLOSSUS, providing incentives for the involvement of different stakeholder groups in project activities, as well as foster their exploitation and uptake beyond the end of the grant.

Keeping that in mind, the main promotional material of the COLOSSUS project is described in the following sub-sections. Each partner will be responsible for translations (if considered necessary) and printing of the material according to its specific needs. Partners should always consult and request approval from the Dissemination Manager/T6.1 Leader Q-PLAN before producing any kind of promotional material.

4.1.1. Project logo

The COLOSSUS project logo was developed on the eve of the project (M1) to meet the visual and graphic requirements of the project. During the COLOSSUS kick-off meeting, various logo options were presented to the project partners in order to allow them to express their preferences and select their favourite design. The selected logo of COLOSSUS (Figure 1) was adopted in agreement with the majority of partners.

Figure 1. COLOSSUS' project logo.

The project's logo is a combination mark which means that it is comprised of a combined wordmark and a distinctive pictorial/icon mark. The icon and text are integrated together to create an image.

The logo design for this project is primarily centred around a font-based approach, emphasizing the project's acronym. Given the inherently memorable nature of the project's name, the strategic use of robust typography serves to enhance brand recognition significantly. The deliberate choice of a modern font aligns with the project's essence, effectively conveying its contemporary and forward-thinking attributes. This design approach underscores the project's commitment to creating a visually impactful and memorable brand identity.

The logo colours are used in all possible circumstances to ensure consistency and to reinforce the visual identity of COLOSSUS. The chosen colour palette seamlessly integrates various shades of blue, to embody the essence of the maritime sector, while building on its attributes of trust, calmness, reliability and responsibility. The colour palette used for the project is illustrated in Figure 2, followed by the representation of the logo in the relevant background colours in Figure 3.

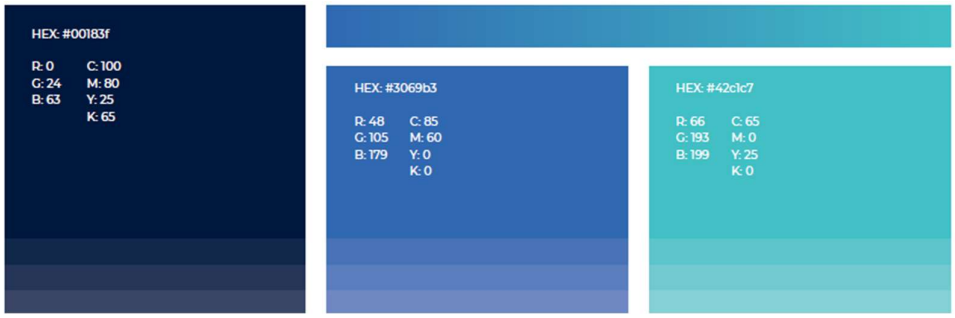

Figure 2. The colour palette of the COLOSSUS brand.

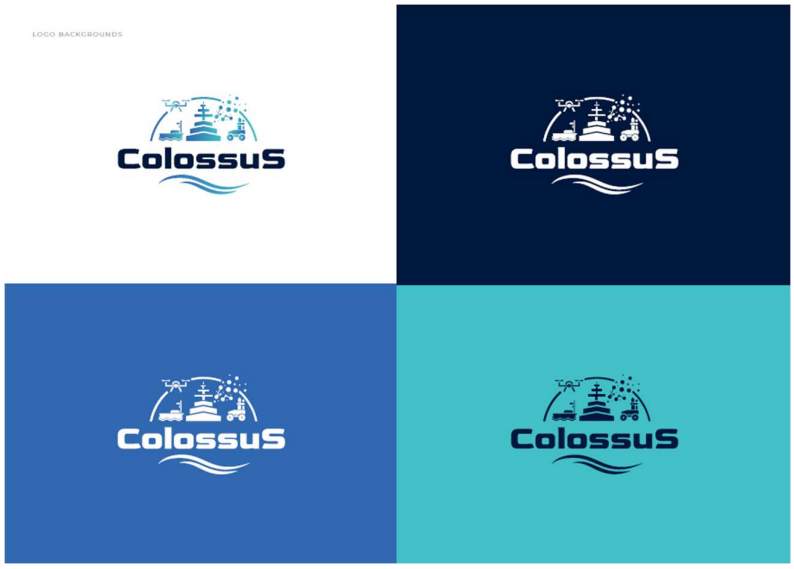

Figure 3. COLOSSUS' logo in different background colours.

In any communication material, deliverable, presentation, etc., produced within the scope of the COLOSSUS project, the EU flag and funding acknowledgement, as depicted in Figure 4, must be prominently displayed.

Figure 4: The EU flag and funding acknowledgement

In compliance with the EU requirements on dissemination of results, as set in Grant Agreement number 101225980, Article 17, any dissemination of results (in any form, including electronic), must display the EU emblem with appropriate prominence and also include the following disclaimer:

> Co-funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Research Executive Agency (REA). Neither the European Union nor the granting authority can be held responsible for them.

4.1.2. Project leaflet, poster, and banner

The project leaflet, poster, and roll-up banner illustrated in Figures 5-8 serve as pivotal components within the framework of communication activities, disseminating crucial project information encompassing its aims, objectives, partners, and other pertinent details. These foundational materials were created by December 2025 (M2).

Additional promotional material will be developed to bolster COLOSSUS events throughout the project duration, in accordance with the needs of the respective partners. This adaptive approach ensures responsiveness to the specific requirements articulated by individual partners, thereby enhancing the efficacy of communication initiatives associated with the project.

Figure 5: COLOSSUS' leaflet (front side)

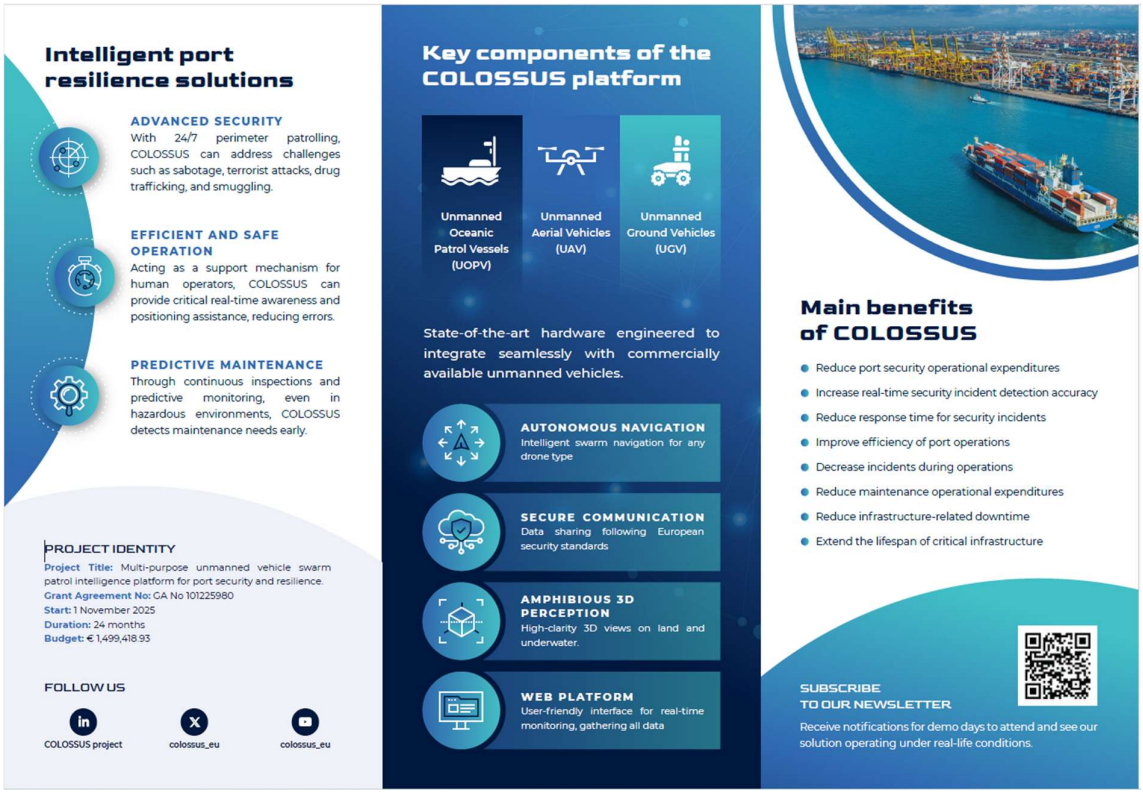

Figure 6: COLOSSUS' leaflet (back side)

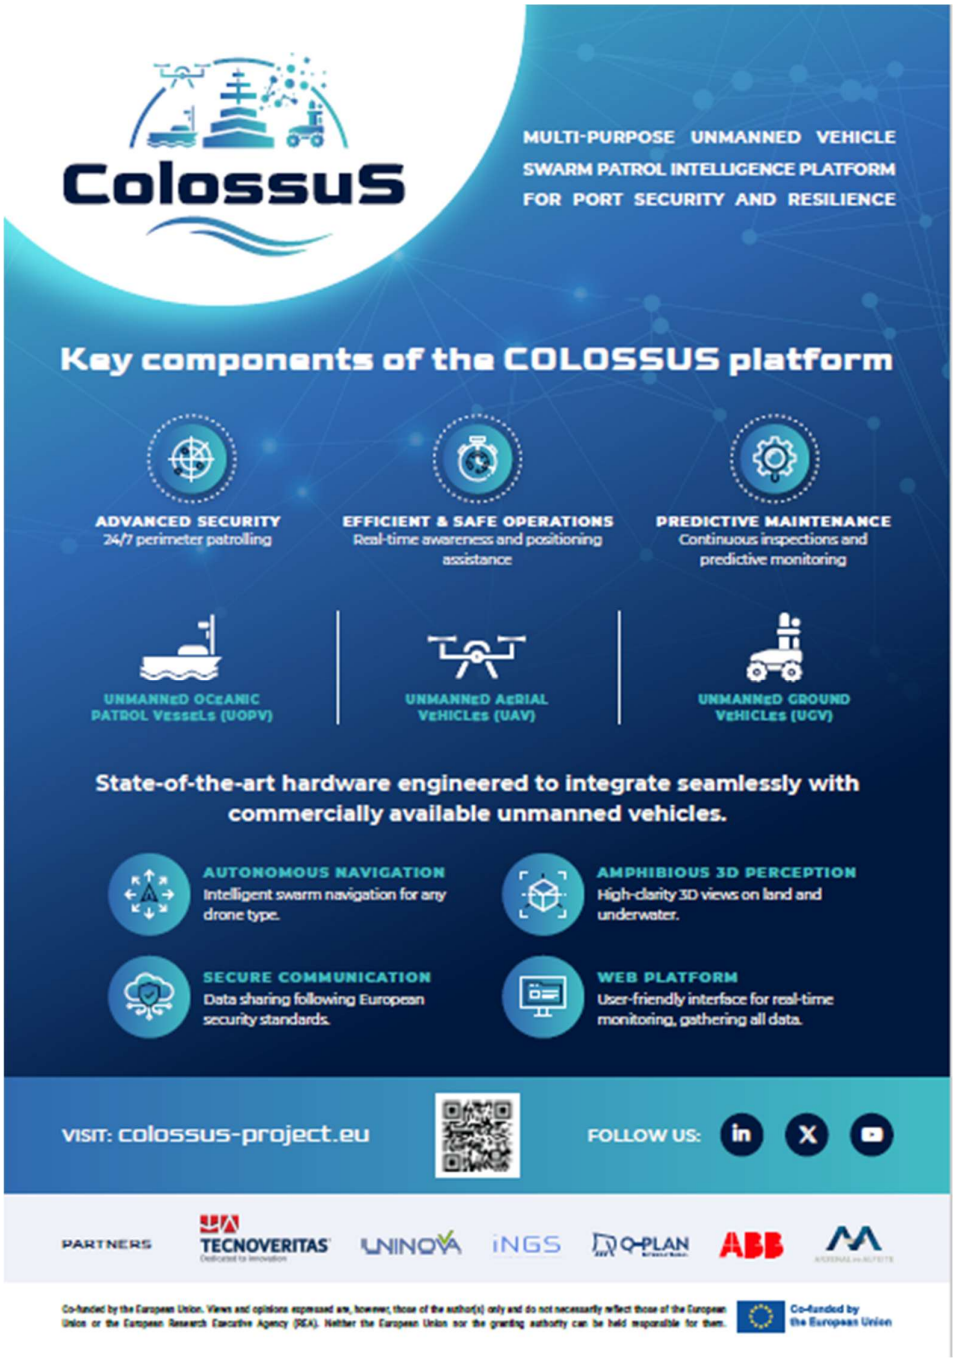

Figure 7. COLOSSUS' poster.

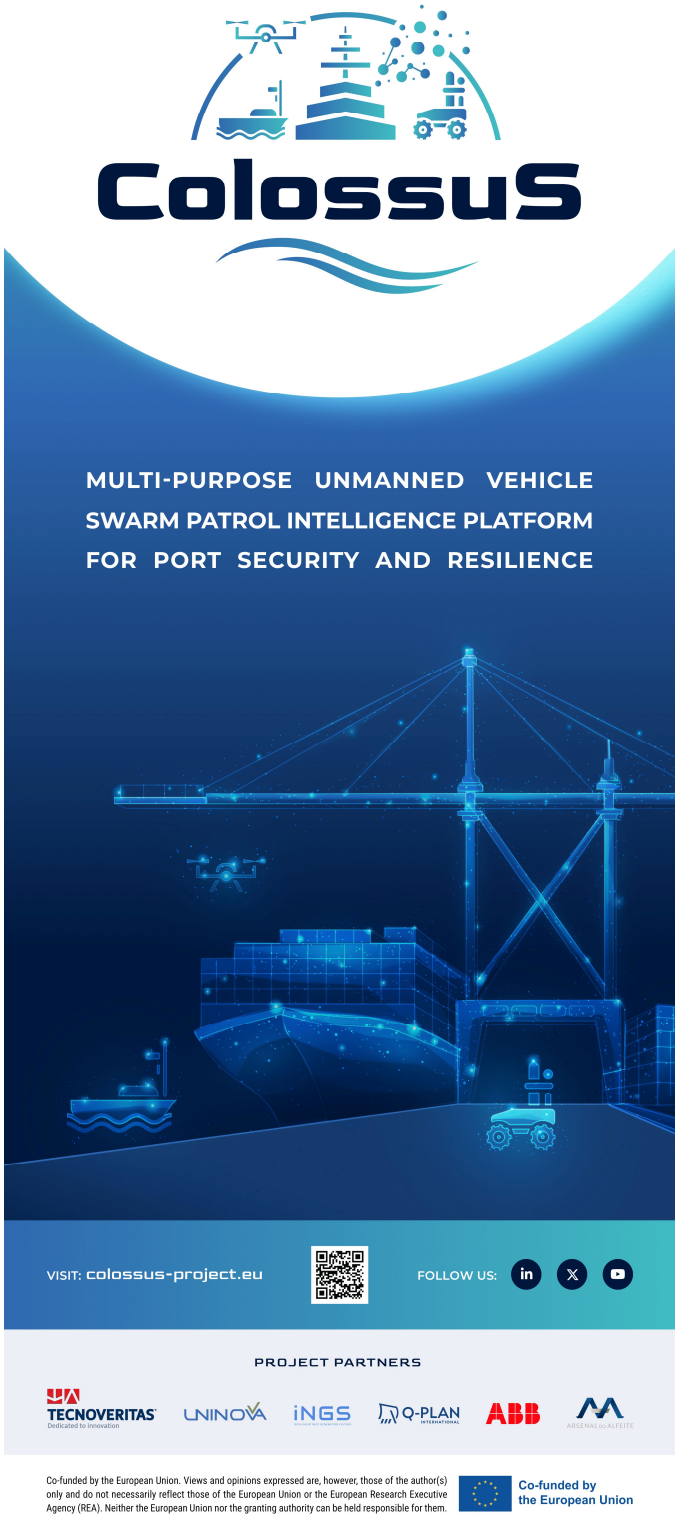

Figure 8. COLOSSUS' roll-up banner.

4.1.3. Templates

Templates have been created for the consortium partners to be able to produce their deliverables and presentations. Branded templates are designed to give slide presentations a consistent appearance and ensure uniformity. The branded templates enhance audience brand recognition and are memorable. COLOSSUS' presentations include the logo, brand colours, fonts, and brand elements from the project's visual identity. In particular, templates for the project's deliverables and partners' presentations have been created and are available to project partners. In addition to the above templates, a COLOSSUS letterhead has been developed, which is useful for various communication activities, such as invitations to events.

The following templates have been prepared for the COLOSSUS project:

- Presentation template.
- Project deliverables and reports templates.
- Project letterhead.

The templates are shown below in Figures 9-11:

Figure 9. Presentation Template (first slide).

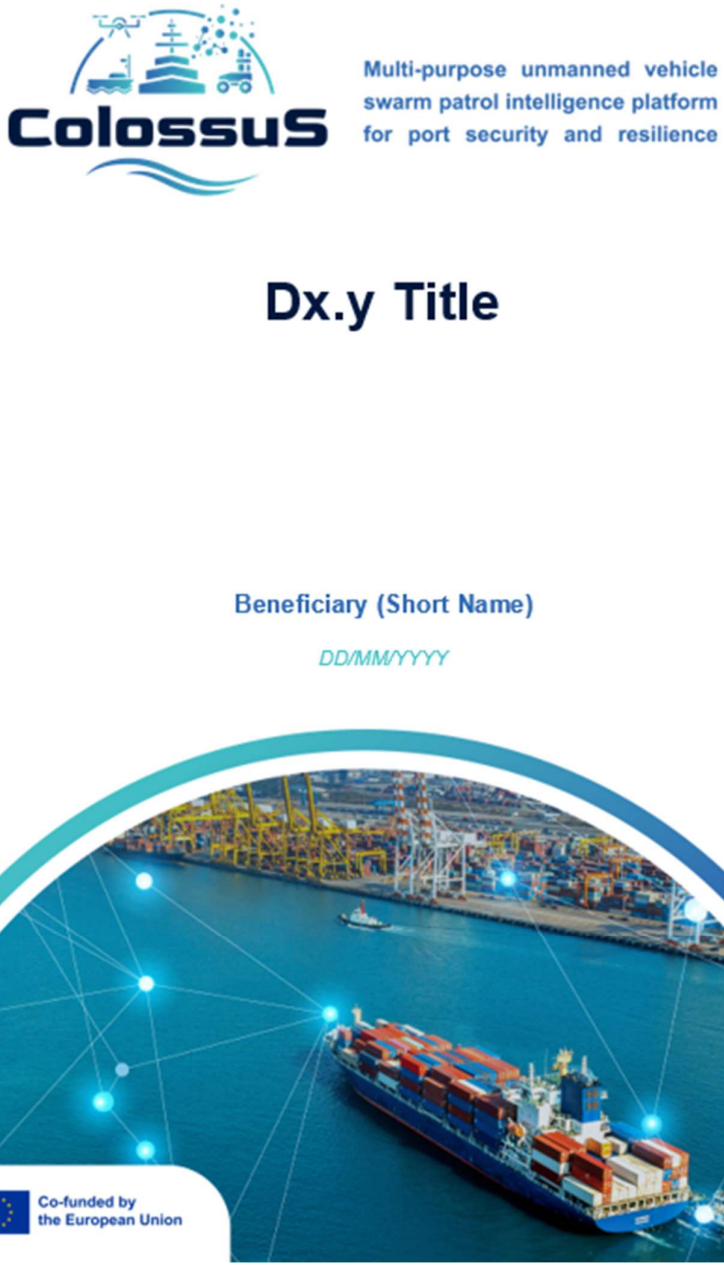

Figure 10: COLOSSUS' deliverable template cover.

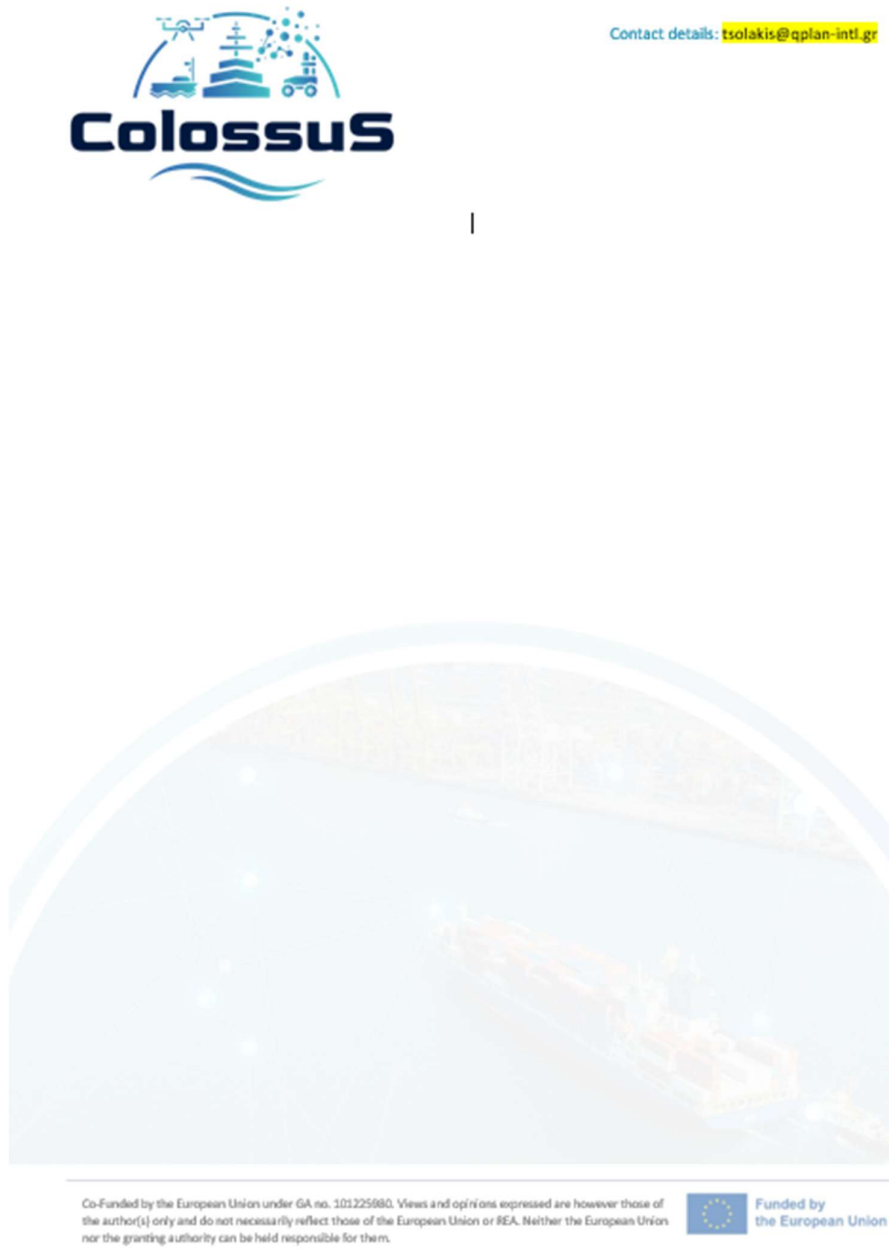

Figure 11: COLOSSUS' letterhead.

4.1.4. Promotional video

A promotional video of approximately two (2) minutes will be produced to effectively reinforce the project's communication activities. The preparation of the video is the responsibility of Q-PLAN. The video will provide an overview of the project that includes vital information. The video is a great way to highlight the mission and the vision of the project. It will be uploaded to COLOSSUS YouTube channel as soon as the video is finalised.

4.2. COLOSSUS' digital presence

4.2.1. COLOSSUS' website

The project's official website will be online by M4 (February, 2026), catering to users on all devices without any limitations or restrictions.

The website's URL has already been established as https://colossus-project.eu (currently under construction), providing a centralised platform for information dissemination and engagement. Users will be able to access the portal seamlessly, fostering an inclusive and user-friendly experience.

For any inquiries or further information, we will encourage individuals to reach out to us via the designated contact email: info@colossus-project.eu.

It will constitute the main gateway to COLOSSUS activities, publications, news and events. Specifically, it will contain information about the project's concept and objectives, the consortium, the use cases, as well as project news. Links to social media accounts of the project and to project partner's webpages but also relevant initiatives will also be included. In addition, it will be equipped with an online newsletter subscription for visitors/users.

As the project evolves, the website will be further enriched with all public deliverables and promotional material. The news section of the COLOSSUS website will be updated regularly, whenever an action/activity is taken. All partners are expected to contribute with news items. For this reason, a report form has been sent to the consortium in order to be filled out in detail with news. This form can be found in Annex II.

Site visits, statistics and other information on visitors' views (e.g., number of pages per visit, time on site, most viewed pages, etc.) will be measured using Google Analytics 4, to which the website is registered since the first day of its operation.

Q-PLAN is responsible for the design, operation, and update of the project's website. The project website will be mentioned in all publicity material generated by the project consortium. The website will be monitored periodically to assess whether the project is on the right path or if increased efforts are needed.

4.2.2. Social Media Accounts

In today's society, the use of social media has become a necessary daily activity, therefore the project's social media accounts (SMAs) are among the main pillars of promoting project's news, events and activities. COLOSSUS utilises social media accounts on LinkedIn, X and YouTube. The above-mentioned accounts have been launched in M1 (November 2025). If any needs arise, other social media may be used in the future. Table 6 contains URL links to the existing social media accounts of COLOSSUS.

Table 6: COLOSSUS' Social Media Accounts

Social Media Platform	Account Name	URL
LinkedIn	COLOSSUS Project	https://www.linkedin.com/company/colossus-horizonproject
X	@colossus_eu	https://x.com/colossus_eu
YouTube	@colossus_eu	https://www.youtube.com/@colossus_eu

The project's social media will be continuously updated in English with news about the project's activities and results, events, scientific news, and updates from several organisations/associations that promote

nanomaterials, graphene in the healthcare sector, as well as news from related EU projects, etc. The frequency of social media posts will depend on the availability of news about the activities and results of the project.

In addition, hashtags are used on the project's posts to help stakeholders easily find them and encourage interaction. The hashtags used on the project's social media accounts are:

- #colossusproject
- #horizoneurope
- #portresilience
- #portsecurity
- #innovation
- #unmannedvehicles
- #artificialintelligence
- #swarmnavigation
- #amphibiousperception

Q-PLAN is responsible for the administration of the COLOSSUS social media accounts. All partners are requested to follow the social media accounts, disseminate the posts through their own networks, as well as to publish posts and news about the project regularly, through the social media of their organisation.

4.2.3. Online newsletter and mailing list

An online newsletter will be prepared and distributed through MailChimp and LinkedIn, presenting among others the achieved results, upcoming activities and events, news from similar initiatives and news in the relevant scientific fields. The frequency of newsletter issues will depend on the amount and importance of news to be presented, with the target to produce a newsletter at least every 6 months, however additional ad-hoc newsletters may be added if deemed necessary.

The initial recipients' list will be created and administered by Q-PLAN. The list will be continuously updated during the project, therefore everyone who is interested will be able to subscribe to the recipients' list by registering on the newsletter section of the project's website or unsubscribe, according to GDPR rules. The recipients' list may also be used for the dissemination of other news and announcements related to the project activities.

The newsletter issues will be prepared by Q-PLAN, with the contribution of all partners regarding the content. The content of each issue will be decided and agreed among the consortium members. Partners are also required to disseminate the newsletter issues through their own channels.

4.2.4. Press releases and other publications

During the project several scientific publications are expected to be published in impactful peer-reviewed international scientific journals and conferences. COLOSSUS will disseminate open research and experimental results via scientific articles and conference presentations. The beneficiaries must ensure open access to peer-reviewed scientific publications relating to their results.

In addition, all authors are responsible for identifying any publishing opportunities and for carrying out all necessary actions to ensure the publications of project news and results. Each partner will make effort to produce publications in the highest quality, which not only reflects on the consortium's reputation but also on the COLOSSUS project. All publications must cite or/and refer to the EU contribution and project grant agreement number, as required in Article 17 of Grant Agreement No. 101225980.

An indicative list of journals, magazines and online promotional outlets that can be used under the context of the project are given by the following tables:

Table 7: Indicative Journals for dissemination of COLOSSUS' results

Title	Impact Factor
Remote Sensing of Environment	11.4
IEEE Transactions on Neural Networks and Learning Systems	8.9
IEEE Transactions on Information Forensics and Security	7.1
IEEE Transactions on Artificial Intelligence	7.1
Journal of Field Robotics	5.2
IEEE Applied Earth Observations and Remote Sensing	5.3
Drones	4.8
Robotics and Autonomous Systems	5.2
Marine Policy	3.7
IEEE Access	3.6

Table 8. Indicative Magazines and Promotional Outlets for dissemination of COLOSSUS' results.

Title
Maritime Security & Defence (MS & D magazine)
Container Shipping and Port Technology - Riviera Maritime Media
Defense and Security Magazine
Defence & Security – Systems International
European Defence Review
Ports Europe
Maritime Journal

During M1 (November 2025), the COLOSSUS first press release was issued. It communicated the kick-off meeting hosted at the premises of TecnoVeritas, in Mafra, Portugal. The kick-off meeting saw all project partners converge to discuss their roles, responsibilities, and aspirations for the successful realization of the project's specific objectives. The press release was shared with the consortium for further distribution.

November 21, 2025

PRESS RELEASE

COLOSSUS: A new Horizon Europe project kicked off!

We are thrilled to announce the official start of the COLOSSUS project, a market-driven initiative funded by the European Union, under Grant Agreement No. 101225980. With a €1.5 million budget, this Horizon Europe Innovation Action officially commenced in November 2025 and will last 24 months.

The project's kick-off meeting took place from November 6th to 7th, 2025, in Mafra, Portugal, hosted at the premises of TecnoVeritas. The kick-off meeting saw all project partners converge to discuss their roles, responsibilities, and aspirations for the successful realization of the project's specific objectives.

The COLOSSUS project presents an integrated solution for digital security, resilience, and maintenance of port infrastructures, providing real-time data access from autonomous unmanned vehicles (i.e., sea, land, and air) and sensors. Developed in response to the increasing demand for maritime security, COLOSSUS aims to revolutionise the protection of EU maritime infrastructures, aligning with the updated EU Maritime Security Strategy (EUMSS 2023). By bringing together Small and Medium-sized Enterprises (SMEs) from various Member States, the project leverages their innovation potential to tackle key challenges outlined in the EU's Blue Growth strategy and the European Green Deal.

The advanced COLOSSUS solutions will be demonstrated in an operational environment (integrated pilot system level) for iterative performance evaluation and validation. Defined use cases will enable operational evaluation and validation across diverse scenarios at the Arsenal do Alfeite (AASA) naval base in Portugal.

Inspired by the Colossus of Rhodes, this project aims to safeguard Europe's port infrastructure via advanced autonomous systems.

The COLOSSUS consortium, under the leadership of TecnoVeritas, is composed of 5 partners across 3 European countries: Czechia, Greece, and Portugal. The consortium members include: TecnoVeritas (TV), UNINOVA, Intelligent Next Generation Systems (iNGS), Q-PLAN International (Q-PLAN), ABB, and Arsenal Do Alfeite SA (AASA).

"The COLOSSUS project is a great opportunity for its SMEs to develop a more mature technological solution, a better product, that addresses EU security policy priorities, and in particular the resilience of European ports" said Dr. Jorge Antunes, TecnoVeritas' CEO.

Figure. The COLOSSUS consortium during the Kick-off meeting at Mafra, Portugal on the 6th and 7th of November 2025.

Co-funded by the European Union under GA no. 101225980. Views and opinions expressed are however those of the authors only and do not necessarily reflect those of the European Union or REA. Neither the European Union nor the granting authority can be held responsible for them.

Co-funded by the European Union

Figure 12. COLOSSUS's 1st Press Release.

4.3. COLOSSUS events

4.3.1. Project events and workshops

The COLOSSUS project is set to embark on a series of meticulously planned events, serving as powerful communication tools to disseminate information about the project's services and outcomes. These events, ranging from co-design workshops to joint sessions with stakeholders and demo days, underscore the project's dedication to engage with key stakeholders in the domain and address real market needs.

Recognising the need for flexibility, the project acknowledges the potential incorporation of virtual solutions in the implementation of such activities.

With a target of at least four (4) organised workshops and events, the project aims to foster transparent communication, continuous improvement, and the ultimate success of its innovative endeavours. Notably, the final achievements will be unveiled during the 2nd Demo Day scheduled close to M24, providing a comprehensive overview of the project's outcomes and advancements.

4.3.2. External events

Partners will participate in several external conferences, exhibitions, and other events of great interest to project's target stakeholders to keep in touch with them, exchange knowledge, and communicate the project value propositions and results. In addition, the targeted events, both scientific and business, will relate to the knowledge fields of the project, the sectors it covers as well as the interests of the project's primary stakeholders. The goal is to keep in touch with the latest advances in research and industry across Europe, share knowledge with respective communities, and establish contacts and interactions with key stakeholders, while at the same time communicating the results of the project. External events in which partners will participate include, among others, business events, exhibitions, scientific events and conferences. Partners should follow the guidelines below:

- If a partner is presenting, the general project presentation should be used with any modifications necessary to this file, keeping the same template unless the event considers mandatory to use event's own template.
- During the event, it is important to disseminate the project's promotional material (leaflets, posters, etc.).
- Several photos must be taken.
- The partner is requested to update the dissemination and communication Manager about participation in the event and to share the photos taken, not later than ten days after the event.
- All partners are requested to fill in the tab located in the 'Dissemination and Communication reporting' file concerning their participation in external events. Submission is required no later than three weeks after the event. The table can be found in Annex III.

In the table below, an indicative list of external events relevant to COLOSSUS is provided.

Table 9: Indicative events relevant to COLOSSUS

Event
The **International Conference on Unmanned Aircraft Systems** (ICUAS), the **Drone-Days Brussels**, the **AI, Data and Robotics Forum** (ADRF), and the **European Robotics Forum** (ERF), are key events highlighting advancements in UAV technologies and robotics applications, fostering collaboration among industry experts, researchers, and policymakers in the field
The **IEEE Conference on Artificial Intelligence** (CAI), the **Conference on Advanced Video and Signal Based Surveillance** (AVSS), the **Conference on Computer Vision and Pattern Recognition** (CVPR), and the **International Conference on Machine Learning and Applications** (ICMLA) are major conferences focused on AI, UAVs, video surveillance, computer vision, and Machine Learning
The **Global Maritime Security Conference** (GMSC), the **International Defence Exhibition** (IDEX), the **World Defense Show**, the **European Defence Week** and **Euronaval** are excellent venues for maritime security and real-time surveillance solutions.
SMM Hamburg gathers the international shipbuilding industry, with over 2k exhibiting companies coming together to discuss latest trends related to shipyards and ports.

The Commercial UAV FORUM, the DroneX Trade Show & Conference and the Web Summit are major events for small innovators to that pitch to and network with industry leaders, other innovators, and solution providers while sharing insights, and fostering collaboration.
The Robotic Experimentation Prototyping Augmented by Maritime Unmanned Systems Exercise is designed to enable, on an annual basis, large-scale experimentation that allows operational communities to work together with academia and industry to develop and test operational concepts, requirements and technological advances.
The annual event of the **Community for European Research and Innovation for Security** that engages policy-makers, scientists, practitioners, SMEs, and civil society organizations in the latest R&I activities on security.
The Annual Conference on Marine Technology is organised every year by the Hellenic Institute of Marine Technology and has become a focal event in Greece for discussing technological advances relevant to the Greek and international shipping, ranging from innovation to practical application.
The European Network Against Crime and Terrorism (ENACT) Annual Event in an annual event organised by the ENACT project to gather stakeholders from law enforcement, policymakers, industry experts, and researchers to exchange R&I knowledge as well as to promote the visibility and uptake of solutions in the fight against crime and terrorism.

4.3.3. Demo Days

Two Demo Days will be (co-)organised during the course of COLOSSUS, one in the first year of the project, and the second closer to the end of the project. The two Demo Days will be organised by AASA (with the support from all partners) through their innovation centre (inovAA), inviting investors, naval and civil actors, industrial actors, and more.

The goal of these events is to spread the accumulated knowledge and present the achievements to industrial actors, policymakers and investors (among other interested parties) towards promoting their uptake across Europe, by securing customer leads. To optimise the event's reach and impact, concerted efforts will be made to arrange it together with other relevant events in Portugal.

4.4. Networking & joint activities with relevant initiatives

The COLOSSUS project aims to establish synergies with key networks and initiatives, including ADRA, EMSA, CERIS, ENACT, etc., active Horizon Europe and EDF projects (and potentially other EU programmes). Q-PLAN, with the support of all partners, will create communication pathways with those projects for collaboration, knowledge exchange, and joint activities.

Table 10: Consortium networks

Consortium networks for dissemination and exploitation results	
EUROPRACTICE	UNINOVA
FORUM OCEANO – CLUSTER DA ECONOMIA MAR	TV
Community for European Research and Innovation for Security (CERIS)	-

Consortium networks for dissemination and exploitation results	
European Maritime Safety Agency (EMSA)	-
AI, Data and Robotics Association (ADRA)	UNINOVA, iNGS, Q-PLAN
World Association for Waterborne Transport Infrastructure (PIANC)	TV, UNINOVA, AASA
European Business and Innovation Centre Network (EBN)	Q-PLAN
European Network of Maritime Clusters (ENMC)	-
ECO Ports network	-
European Organisation for Security (EOS)	-
European Shipowners (ECSA)	-
FRONTEX	TV
CROSSMARE and MARCONNECT projects	iNGS

Q-PLAN, serving as the Task Leader, has created a synergy list, a copy of which is available in Annex IV. Throughout COLOSSUS' lifespan, this list will be enriched even further, and the revised version will be part of the next report. Emphasizing collaborative activities, as outlined in the "Dissemination and Communication Plan", is vital for unlocking the full potential of the COLOSSUS project. In this respect, the consortium should remain vigilant, actively seeking new collaborations and joint actions to ensure the project's success.

To date, the consortium has already initiated preliminary discussions with several initiatives, such as DG HOME, Frontex, EBN, or relevant projects and initiatives, to introduce COLOSSUS, establish synergies and discuss future collaboration. A synergy has already been established with the sister project ORBIS.

4.5. EU Dissemination channels

A tentative list of EU dissemination channels that may be utilised by COLOSSUS throughout its duration is provided below:

- **CORDIS** is the EC primary source of results from projects funded by the EU's framework programmes for R&I. COLOSSUS is already featured in CORDIS, and key public information will be uploaded after each reporting period.
- The **Horizon Results Booster** addresses projects eager to go beyond their dissemination and exploitation obligations under Horizon funding schemes.
- **Horizon Results** is a repository of Key Exploitable Results of EU-funded research and innovation projects.
- **Open Research Europe** is an open access publishing platform that beneficiaries can use to publish any research results coming from R&I funded programmes, and it is in line with the EU's open science policy.
- **Horizon Dashboard** is an interactive knowledge platform where statistics and data on EU Research and Innovation programmes can be extracted.

5. Timeline and implementation plan

In Figure 13, an action plan of COLOSSUS' dissemination and communication activities is presented, spanning the whole duration of the project.

Activity	Responsible Partner	Related WPs	2025		2026						2027			
			1st year						2nd year					
			November	December	January-February-March	April-May	June-July-August	September-October	November	December	January-February-March	April-May	June-July-August	September-October
Development of promotional material														
Logo	Q-PLAN	6												
Templates (report, presentation and letterhead)		6												
Leaflet, poster, and infographic		6												
Promotional videos		6												
Website

Figure 13. Timeline for the implementation of COLOSSUS' D&C main activities

6. Key Performance Indicators and Monitoring

To measure the success of COLOSSUS" dissemination and communication strategy, the following KPIs will be employed, and all dissemination activities will be monitored with their results being compared to the KPIs so as to assess whether COLOSSUS is on the right path or if increased efforts need to take place.

Table 11. COLOSSUS' Dissemination and Communication KPIs.

Indicator	Target (Impact)
Project workshops and events	≥4
Stakeholders participated in project events	>100
Synergies with initiatives & networks	≥5
External events attended	10
Social Media Promo Campaigns	≥4
Followers on social media	>1,000
Views of the promotional video	>2,500
Number of newsletters published	4
Number of press releases published	4
Promotional material distributed	>500
Stakeholders engaged in overall	>2,500

To meet target values, project partners are expected to continuously conduct publicity actions and also report all publicity and communication outcomes regularly. Q-PLAN will be overall responsible for monitoring and evaluating COLOSSUS' dissemination activities.

Partners must provide detailed reports on all communication and dissemination actions through the COLOSSUS "Dissemination and Communication Reporting Template" (Annex III), which has been shared to all partners. Q-PLAN will notify all partners regularly for input collection.

Any promotional material related to the project produced by a partner should be reviewed and approved by the WP6/7 leader, Q-PLAN. Each project partner should promptly contact Q-PLAN if they identify opportunities, problems, or risks during the planning or implementation of publicity actions.

7. Conclusions

This document, titled “Dissemination & Communication Plan – 1st Version”, provides the framework and guidelines for the successful implementation of dissemination and communication activities throughout the lifespan of the project and beyond. As the project evolves, this document will be updated and refined in order to provide a more detailed analysis of the dissemination actions and plans. The actions and plans of this deliverable answer to the following questions:

- What to disseminate and/or communicate?
- To whom?
- How?
- When?

This document also provides the monitoring mechanism of the communication and dissemination activities, which is based on targeted KPIs. By communicating and/or disseminating the project’s tangible and intangible assets through the most effective channels and tools to timely reach the targeted groups, COLOSSUS will be able to not only go beyond these ambitious KPIs but most importantly lay the foundations for the successful rollout, replication and thus sustainability of its outcomes. As the project evolves, the DCP will be updated, results will be presented and progress against targets will be measured in the 2nd version (M12) and 3rd version (M24).

Dissemination & Communication guidelines

November 2025

Contact details: politis@qplan-intl.gr

This document provides you with key initial guidelines regarding communication and dissemination activities and introduces the main dissemination monitoring tools that you are kindly asked to use throughout the project.

1. Main guidelines

1. Actively contribute to the dissemination of project results and key messages.
2. Do not forget to include the COLOSSUS logo and website URL, together with the EU logo and the disclaimer:

Co-funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Research Executive Agency (REA). Neither the European Union nor the granting authority can be held responsible for them.

In practice, it should look like this:

Co-funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Research Executive Agency (REA). Neither the European Union nor the granting authority can be held responsible for them.

When displayed with another logo, the EU emblem must have appropriate prominence.

You can download the needed EU emblem in the desired resolution following this link:

Co-funded by the European Union

Co-funded by the European Union

Co-funded by the European Union

Co-funded by the European Union

3. If possible, follow the style guide concerning writing style, formatting options, numbers and currency, abbreviations and acronyms, captions, electronic cross-references, naming conventions, and citation style. In general:
   - Use Arial for headings and for text in documents.
   - Always use the same style for references, both for in-text citations and in the bibliography/footnotes.
   - Be consistent in using currency references (for example, use EUR instead of € throughout).

Funded by the European Union

Page 1 of 7

- Be consistent in the numbering format; comply with the British usage (e.g. 75,000,239.23), unless differently indicated by the bid manager.
- Make sure to introduce each abbreviation and acronym the first time you use it and create an abbreviation/acronym list at the beginning of the document.
- Review the language and the coherence of the structure of the text you drafted.

4. Whenever possible, use the templates that are provided to you, i.e. letterhead, presentation, and deliverable template. A leaflet, a poster and a roll-up will be prepared for you to use throughout the project. Other communication materials will be prepared ad-hoc if needed. If there is a need for a different template, please reach to Q-PLAN to discuss about it and identify the best course of action.
5. Always inform Q-PLAN regarding every dissemination and communication activity that you plan to carry out (e.g., organising an event, writing articles for websites or magazines, participating in an external event, etc.) at least one week prior to your activity. This will enable us to publicize it through the COLOSSUS communication channels in a timely manner. Whenever you want to send us a post, please use the dedicated "news item" template, which is available on Google Drive. You should download it from Google Drive and save it to your personal drive. Then, when you complete the form, send it back to us via email, including the attached photos.
6. You will have to report in detail all the communication and dissemination actions you undertook (see COLOSSUS Dissemination & Communication Reporting Template for instructions). This template is in line with the new Horizon Europe programme needs and is sent to all partners by email. That report is available on Google Drive.
   a. Always report about meetings and events you organised and/or participated to "D&C Reporting" template.
   b. The initial expectation for input collection is every 6 months and Q-PLAN will notify the consortium in due time to start collecting input as well as in case of any changes.

Important Note: The reporting information for all D&C activities on the SYGMA platform has been officially defined by the European Commission (EC). This template is mandatory for reporting all such activities.

7. A Synergies List is provided for all partners to fill. For updates during the project period, when suitable opportunities arise (i.e., a joint activity with another organisation/initiative/project, outside COLOSSUS, is organised), please contact Q-PLAN as soon as there is a list update.
8. In compliance with GDPR requirements, always gather consent, when collecting, using, and storing personal data (i.e., email, photos, etc.) during your events/conferences (see also the COLOSSUS CA).

D&C guidelines Page 2 of 7

2. Guidelines for enhancing COLOSSUS online presence

This section provides you with some key initial guidelines regarding your expected contribution and use of the COLOSSUS website and social media accounts (SMAs).

Always remember that a strong online presence of COLOSSUS is also a strong promotion of your activities.

2.1. Website

1. Actively contribute to the news section of the website. Please send each news item to Q-PLAN. For all COLOSSUS activities collect high-quality photos, and videos if possible, and share them with Q-PLAN. This will enable us to use them on the project website and project SMAs. For generic images, that do not pertain to implemented project activities, simply outline your expectations together with content about the activity and Q-PLAN will select a suitable royalty-free image for the post.
2. Inform Q-PLAN regarding every event you organise or take part in for the purposes of the project (e.g., conferences, workshops, seminars etc.) and provide Q-PLAN with a link to the event if available, so that it can be posted online in the dedicated section of the website.
3. Inform Q-PLAN about news articles (e.g., newspaper article, blogpost, TV interview, etc.) and provide Q-PLAN with a web link (where possible) for giving it more visibility online.

2.2. Social Media Accounts (SMAs)

1. Follow all COLOSSUS SMAs (i.e. LinkedIn, X, and YouTube, when available) and use them: monitor announcements and posts, comment, like and retweet/repost - share.
2. Do make your own posts to foster discussion and keep the page alive, either in English or in both English and your native language – Make sure to tag COLOSSUS so that we can follow up accordingly.
3. Promote the COLOSSUS SMAs within your network of contacts.
4. Signal to COLOSSUS relevant profiles that we could follow (on X and LinkedIn).
5. Select among the project hashtags when posting on SMAs and add any that you feel appropriate for your post. Available hashtags are:

   Mandatory: #colossusproject

   Optional: #horizoneurope #Port_Security #Port_operation #Port_maintenance #Unmaned_vehicles #swarm_inteligence #3D_modelling #AI

6. If you make a short video, edit it to enhance the project identity (add the name of the project, the logo, the EU emblem and the disclaimer. Q-PLAN will upload it on YouTube.

The above-mentioned points will be updated, when necessary, to be in line with the project's requirements and progress.

D&C guidelines Page 3 of 7
